

ANNUAL SCHOOL EVALUATION
Glade Spring Middle School
2011-2012

Glade Spring Middle School (GSMS) presented a Comprehensive Plan for school improvement as it related to Washington County Schools' Comprehensive Plan. The objectives for the 2011-2012 school year included the following: GSMS will (1) to improve test scores in the areas of math and language arts; (2) to engage students in the use of effective classroom technology; (3) to provide staff development through book discussions and workshops with the book "Failure Is Not An Option" and (4) meet all local, state, regional, and federal accreditation standards.

GSMS is to commended for meeting their goals for the 2011-2012 school year. They met all local, state, regional, federal accreditation standards. GSMS meet the required Annual Measureable Objectives in math and reading; however, there will be a continued goal to focus on math for the 2012-2013 school year. Administration and faculty continue to develop and implement new ways to provide students the opportunity to be exposed to and utilize technology in the school setting. They have seen an increase in student engagement by offering options for students to present what they are learning through technology in creative ways.

The faculty was provided many professional development opportunities including a book study on "Failure is Not an Option". Faculty is participating in professional development activities and completing on-site visits with PHHS faculty. They are continuing to look at data and beginning to focus on corrective instruction practices versus re-teaching practices.

The goals for the 2012-2013 school year are the following: (1) to provide an instructional program in Mathematics 6-8 that leads to opportunities for student success in accordance to local, state and federal mandates; (2) to enhance collaboration and communication between schools; (3) to provide professional development for the faculty and staff that encourages the creation, development and implementation of techniques and strategies associated with Assessment for Learning (formative assessment); (4) to meet all local, state, regional, and federal accreditation standards.
